

SABLE[™]

Black Lake Colorant

Sable[™] Black Lake Colorant is a highly concentrated formulation of a water-soluble dye that contains more than twice the dye concentration compared to other typical lake dyes on the market.

Sable[™] is designed for use in lakes, ponds, decorative water features and other impounded bodies of water with limited outflow.

Sable[™] beautifies murky, cloudy or off-colored water by turning the water body into a dark backdrop thereby creating an appealing, reflective water surface.

Net Contents: 1 Gallon (3.79 L)

XXXXX1G GHSversion: 18XXX

SABLE™ Black Lake Colorant

APPLICATION RATES:

1. Determine the number of acre-feet to be treated:
 - Multiply the acres of surface area [length(ft) x width(ft) / 43,560] by the average depth(ft).
2. Apply ½ gallon of **Sable™ Black Lake Colorant** per acre foot, (1,234 cubic meters of water).

APPLICATION INSTRUCTIONS:

- Always wear rubber gloves when handling **Sable™ Black Lake Colorant**.
- Pour **Sable™ Black Lake Colorant** from the container directly into the water along the shore line.
- Dispersion of the color will depend on the movement of the water, but should occur within hours after treatment.
- As needed, add additional **Sable™ Black Lake Colorant** to the water to maintain the desired coloration of the water.
