

CAMPEY™

Turf Brush

Developed for turf producers, the turf brush takes the concept of brushing and takes it to a new level. Mounted on the front of the tractor, it rakes the turf-clippings from a distance of 6m, windrowing them together to form a line only 1.2m wide to be vacuumed up by your trailing sweeper, thus doubling the collecting output. This in turn dramatically reduces the time spent in the field. Additionally, the tractor runs astride the clippings, avoiding compaction, keeping them consistent and loose for the vacuum sweeper to collect at a much faster and more efficient rate. The brush also has a harrow effect on the turf, leaving it even and stronger for future growth.

Specification

Height (folded)	3.20mtr
Transport width	2.97m
Working windrowing	6m
Working "worm casting"	7m
Windrow width	1.2m
Working height	-0.04m up to 0.03m
Weight	750kgs (spec'd for dual usage) / 500kgs for standard version (just windrowing)

Oil connection requirements 1 double acting connection and one single acting connection with pressure less return

Campey supply market leading, innovative turf care machinery worldwide, we're continually researching new techniques and refining existing practices to help turf care professionals achieve perfection.
