

Perfect Results on **Undulating Turf**

VERTI-CUT
FLEX 2000

Verticut on Every Contour

The Verti-Cut Flex 2000 efficiently removes thatch on contours. It goes up, down and around, all with less scalping, via multiple points of flexibility, floating wings and Passive Pivoting Suspension™. Together, these technologies simulate a spherical range of motion, enabling continuous work across uneven terrain.

Compact but with a wide working width, the Verti-Cut Flex 2000 is highly manoeuvrable. Ready for the golf course, sports fields and anywhere that demands more than a straight, flat line. Its carbide-tipped knives ensure reliability season after season.

Thatch Removing

Clears organic build-up, making turf healthier by improving water, air, and nutrient flow.

Contour Following

Ensures cutting depth across hills, slopes and around obstacles.

Turf Pro Ready

Folding wings for storage, removable guards for cleaning, low-maintenance belt drive.

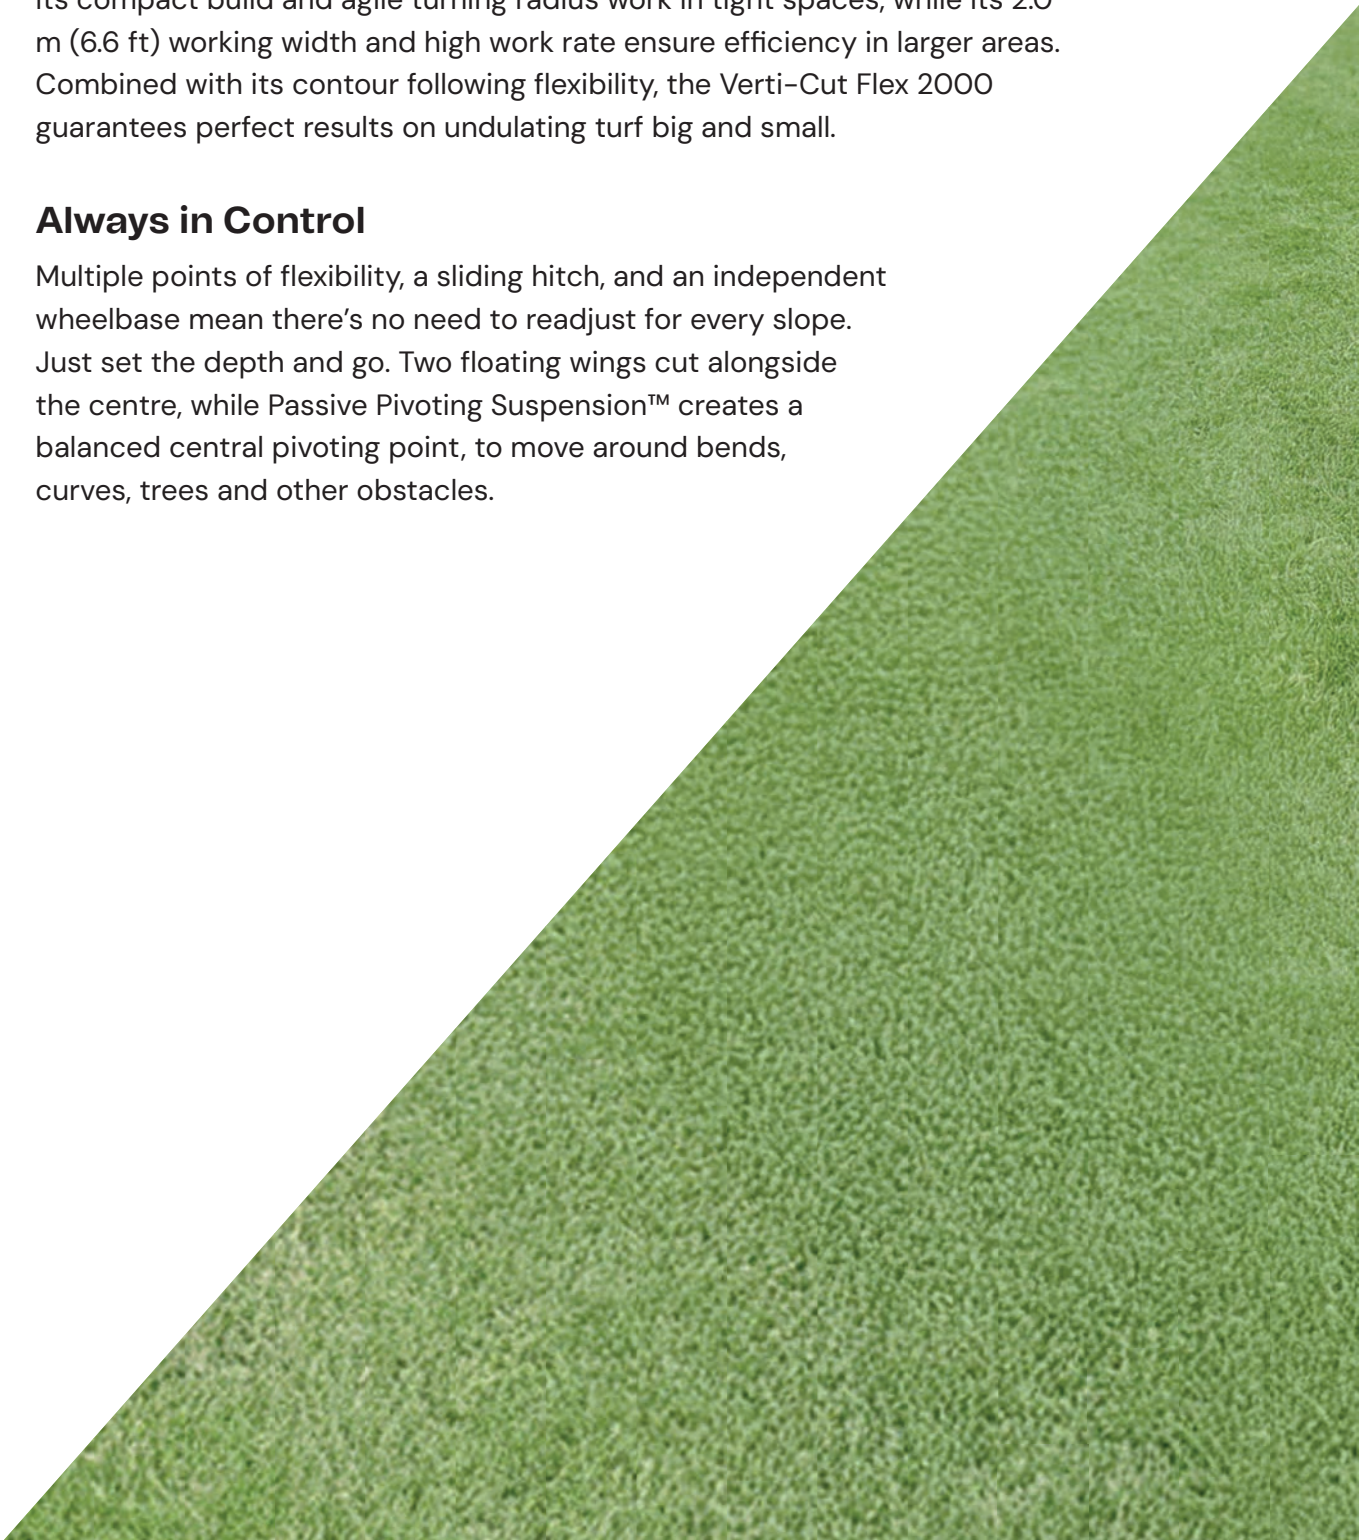

The Professional **Choice**

The Verti-Cut Flex 2000 is the professional choice for verticutting up and around fine turf, rolling fairways, banked sand traps and between bending trees.

Its compact build and agile turning radius work in tight spaces, while its 2.0 m (6.6 ft) working width and high work rate ensure efficiency in larger areas. Combined with its contour following flexibility, the Verti-Cut Flex 2000 guarantees perfect results on undulating turf big and small.

Always in Control

Multiple points of flexibility, a sliding hitch, and an independent wheelbase mean there's no need to readjust for every slope. Just set the depth and go. Two floating wings cut alongside the centre, while Passive Pivoting Suspension™ creates a balanced central pivoting point, to move around bends, curves, trees and other obstacles.

Passive Pivoting Suspension™ Explained

Passive Pivoting Suspension™ allows for effortless navigation around curves, bends and obstacles. The Verti-Cut Flex 2000's central pivoting point is balanced, so when taking slight turns, it follows the tractor in a way that does not tend to scalp the turf. Heavy-duty dampers stabilize the machine while in work.

Verti-Cut Flex 2000

Built to Last

The Verti-Cut Flex 2000 is engineered with real-life use in mind and has been extensively tested under demanding conditions. Its robust design, durable carbide-tipped knives and reliable performance work for you season after season.

Its belt-driven system offers a single grease point and is designed for low daily maintenance. The blade guards remove for easy cleaning and its wings fold for compact transport.

Floating Wings Cut Deep and Fold Up

Attached to the central cutting unit are two floating wings. They are flexible, going up and down with undulations, and cutting deeply into the turf. The wings also fold up for compact storage. Inside the wings are powerful, durable carbide cutting knives that are protected by removable guards.

Specifications

Specification	Verti-Cut Flex 2000
SKU	S0001602
Working Width	2.0 m (6.6 ft)
Working Depth	0–40 mm (0–1.57 in)
Blade Spacing	38 mm (1 1/2 in) standard, 25 mm (1 in) or 50 mm (2 in) optional
Blades	Carbide tipped, 2 mm (5/64 in) standard, 3 mm (1/8 in) optional
Max. Working Speed	5 km/h (3.1 mph)
Max. Work Rate	10,000 m ² /h (107,639 ft ² /h)
Weight	420 kg (926 lbs)
Min. Tractor Required	30 HP
Min. Lifting Capacity	520 kg (1,146 lbs)

Ready to Level Up Your Cut?

At Redexim, we are always happy to help. Whether it's for basic information, complex solutions or logistics, our expert team talks to you about machines you have or ones you want. Ask us anything. From pricing and availability to compatibility and spare parts and anything else, we'll provide clear, tailored answers to help you make the right decision.
