

TRILO®

S3 The compact all-rounder

Now with adjustable air outlet and type approval for the whole of Europe

- EU type approval for transport on public roads
- Adjustable air outlet
- New design

Type approval for the whole of Europe

You can start using the S3 on the public road straight away because the S3 now has a type approval for the whole of Europe.

With a new design and an adjustable air outlet

The TRILO S3 has a new look and now looks even sleeker. The vented airflow can now be adjusted optimally using the adjustable end of the dust cap. You can now control the ideal blower direction yourself.

Sweeping, mowing or verti-cutting and collecting in one pass

Because you can change the working axis in the suction hood, the S3 can sweep, verti-cut or mow and collect in one pass. This means you can use the S3 all year round for multiple tasks. Optionally, the S3 can be provided with a hand-operated wander hose to suck up material from hard to reach places.
